## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 23-26 and 34-61 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 23, the prior art of record fails to disclose or render obvious a plurality of mating gear teeth disposed on a rotatable sprinkler housing and an arc stop assembly such that the plurality of mating gear teeth are selectively engagable in combination with a lower stationary sprinkler housing, an arc stop assembly, and a fixed arc stop member wherein at least one position of the arc stop member enables the rotatable sprinkler housing to rotate in one continuous direction.

Regarding claim 34, the prior art of record fails to disclose or render obvious a sprinkler housing having a rotating portion, a stationary portion and an arc adjustment portion such that the rotating portion includes first set of gear teeth and the arc adjustment mechanism includes a second set of gear teeth selectively engagable with the first set of gear teeth in combination with an arc stop that is moveable between a minimum arc setting and a full setting.

Regarding claim 38, the prior art of record fails to disclose or render obvious a method of establishing full circle operation of a sprinkler comprising providing a sprinkler having a rotating section, a stationary section, and an arc adjustment section, disengaging the arc adjustment section from the rotating section without changing the overall height by decoupling a gear engagement between the arc adjustment section and the rotating section, moving the arc adjustment section to full circle mode, and

maintaining the established sprinkler height during both disengaging of the adjustment section and moving of the adjustment section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
